

MEDICAL CODING AND BILLING

ASSOCIATE OF APPLIED SCIENCE
60 CREDITS

Medical Coding and Billing is designed to equip students with the necessary skills to thrive in the ever-expanding field of electronic billing and reimbursement. Mastering electronic medical records prepares graduates to navigate healthcare systems, including clinical, administrative, and revenue capture processes.

In today's healthcare, resource allocation has shifted the billing system. Healthcare facilities now value coding, billing, and electronic medical record management skills. Experience in this area is highly sought-after, increasing employability.
