

RECOVERY TECHNICIAN

▶▶▶▶ CERTIFICATE
18 CREDITS

In this program, students will learn about the impact of substance abuse and chemical dependency on society. They'll gain an understanding of addiction, different drugs (both legal and illegal), working with individuals facing physical and psychological addictions, various treatment options, and counseling approaches.

Graduates possess the expertise to excel as competent assistants in the realm of substance abuse and addiction treatment. Additionally, this program serves as a valuable avenue for professional development for individuals already engaged in the field.

CAREER OPPORTUNITIES

- Rehabilitation Treatment Programs
- Outpatient Substance Treatment Centers
- Sober Living and/or Halfway Houses
- Detox Centers

KEY COURSES

- Introduction to Social Work
- Chemical Dependency and Addictions
- Drugs in Society
- Ethics in the Social Sciences
- Introduction to Chemical Dependency Counseling

WE ARE ACCREDITED.

Penn Highlands is accredited by the Middle States Commission on Higher Education. This means you will receive the same quality of education as major four-year institutions in our area.

WE ARE FAMILY.

Our supportive staff and faculty are here for you. We are available to listen, offer advice, and provide support to help you succeed. With an 18:1 student-to-faculty ratio, the hands-on support you will receive feels like family.
